

# Micro aerator

for water-soluble products

Microbial loads and contamination decrease the lifetime of your water-soluble product.  
By using the micro aerator this problem will be minimized or even fully solved.

## Technical facts:

Tank size:	300 - 500 liters
Depth of immersion:	up to 750 mm
Voltage:	230 V / 50 Hz / 5 W
Working temperature:	approx. 50 °C
Working range:	pH-value 4 - 12
Ceramic aerator:	2 pieces
Air hose to the aerator:	approx. 3m length
Measurements (L x W x H):	180 x 150 x 60mm
Weight:	approx. 1,85kg

## Benefits:

- easy installation
- cost savings from longer product life
- increased performance of your water-soluble product
- decreased risk of skin irritation
- unpleasant odours disappear
